AKIJ iBOS

ABOUT iBOS
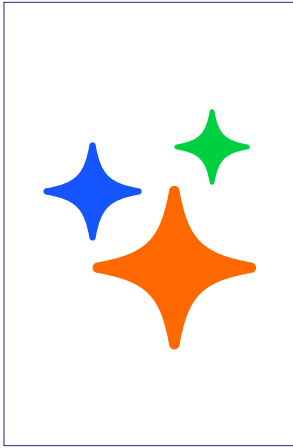

When it comes to enterprise resource planning (ERP) solutions, business process optimization, and website building - AKIJ iBOS (Intelligent Business Operating System) Limited appears to have mastered the state of the art.

Because of our ability to provide comprehensive, integrated, and highly intelligent business solutions for a wide range of industries, we like to think of ourselves as problem solvers. By streamlining the corporate world, we are strengthening Bangladesh and making software history.

Our vibrant, inquisitive, and dedicated brains focus on working in conjunction with our clients to ethically resolve

A Concern of Akij

We, **AKIJ iBOS Limited**, are a concern of **AKIJ Resource**, one of the biggest industrial conglomerates of Bangladesh.

Akij Group has been expanding its operations through different industries for decades and have now started their journey in the IT industry where they have set their focus on reaching the peak of innovation through **AKIJ iBOS Limited.**

As a part of their faith in our excellence and expertise, they have been running all their concerns with 35,000+ employees on our software for the past 15 years.
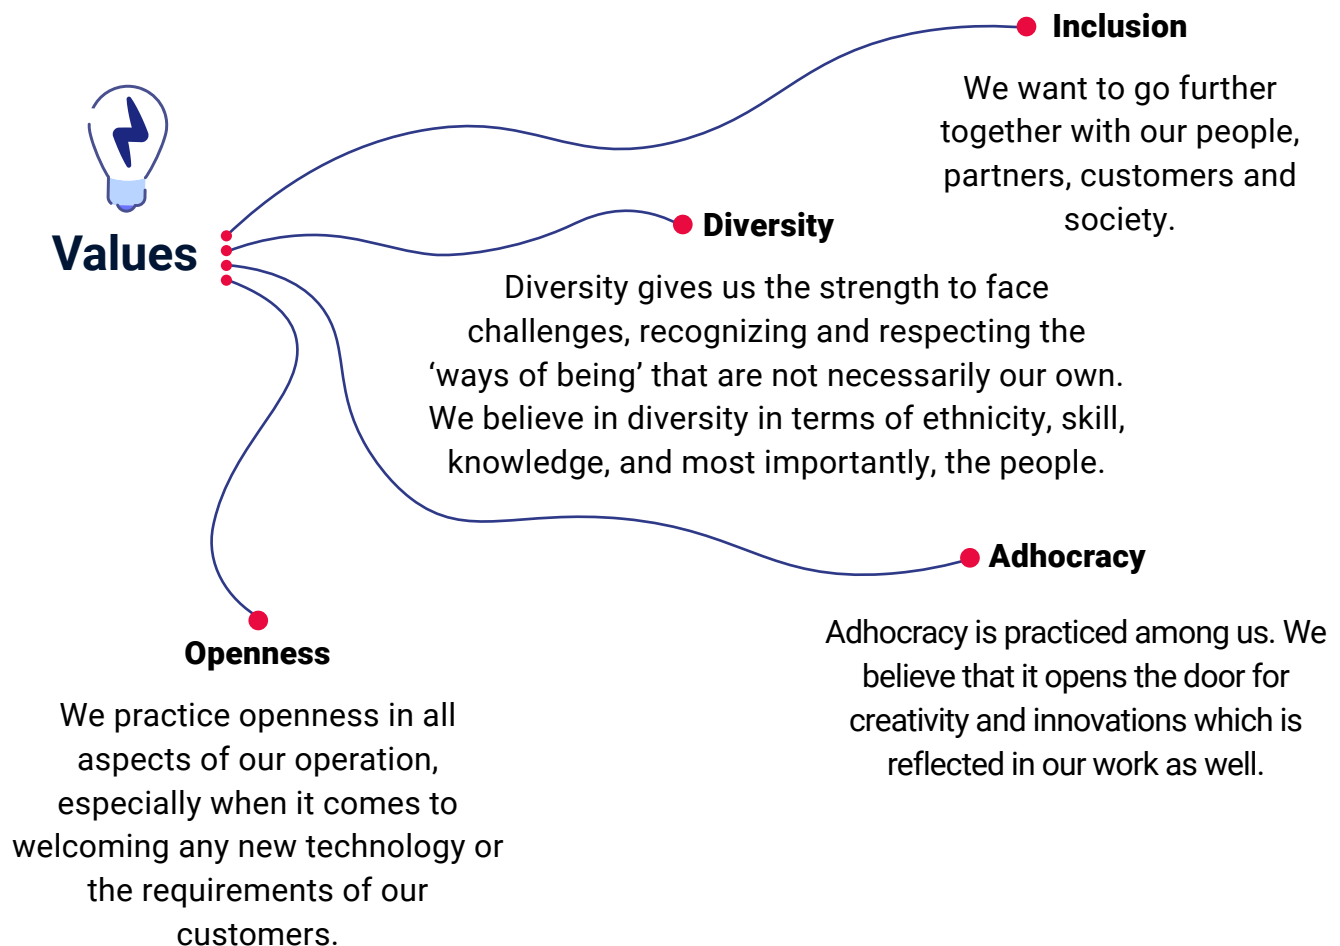

iBOS Drivers

Vision

Creating a world where businesses manage their operations
seamlessly with reliable business solutions
that will unlock the full potential and accelerate growth.

Mission

- Simplifying business processes with intelligent software solutions.

- Reducing dependency on complex and hard-to-adapt software.

- Empowering growing businesses with standard and reliable solutions

- Enhancing transparency, accountability, and efficiency in business operations

Values

Inclusion

We want to go further together with our people, partners, customers and society.

Diversity

Diversity gives us the strength to face challenges, recognizing and respecting the 'ways of being' that are not necessarily our own. We believe in diversity in terms of ethnicity, skill, knowledge, and most importantly, the people.

Adhocracy

Adhocracy is practiced among us. We believe that it opens the door for creativity and innovations which is reflected in our work as well.

Openness

We practice openness in all aspects of our operation, especially when it comes to welcoming any new technology or the requirements of our customers.

Robust Data Security

We're committed to keeping any kind of error out of the book without compromising data security.

Optimized Business Process

We focus on business process optimization for saving our client's time, energy and resources along with enhancing efficiency.

Top-notch After-Sale Service

Flawless after-sale service is our commitment to the respected customers that will bring maximum outcome from our solution or service.

How We Work

There are plenty of firms offering business solutions but at AKIJ iBOS, we count clients as partners. We measure our success by our client's success and growth.

The way our customer defines and optimizes their process plays a key role in obtaining a favorable outcome. With expert and experienced consultation, we are committed to simplifying their process in a secure and complete way.

Regardless of the customer's business size, they can trust us with their concerns as we work together to find the most optimum solution for them.

Steps of Our Process

Consultation

This discussion is the first step of a long journey. We define and analyze the customer's problem and needs.

01

Designing

In order to find the best-suited strategy for them, we find the process gap and design the workflow accordingly.

02

Development

Our expert team of designers and developers collaborate and we redesign the process.

03

Integration

This is where we integrate the process into the customer's system. Their feedback is appreciated at any time.

04

Deployment

The customers are offered the standard solution that meets their requirements and ensures optimum use of their resources.
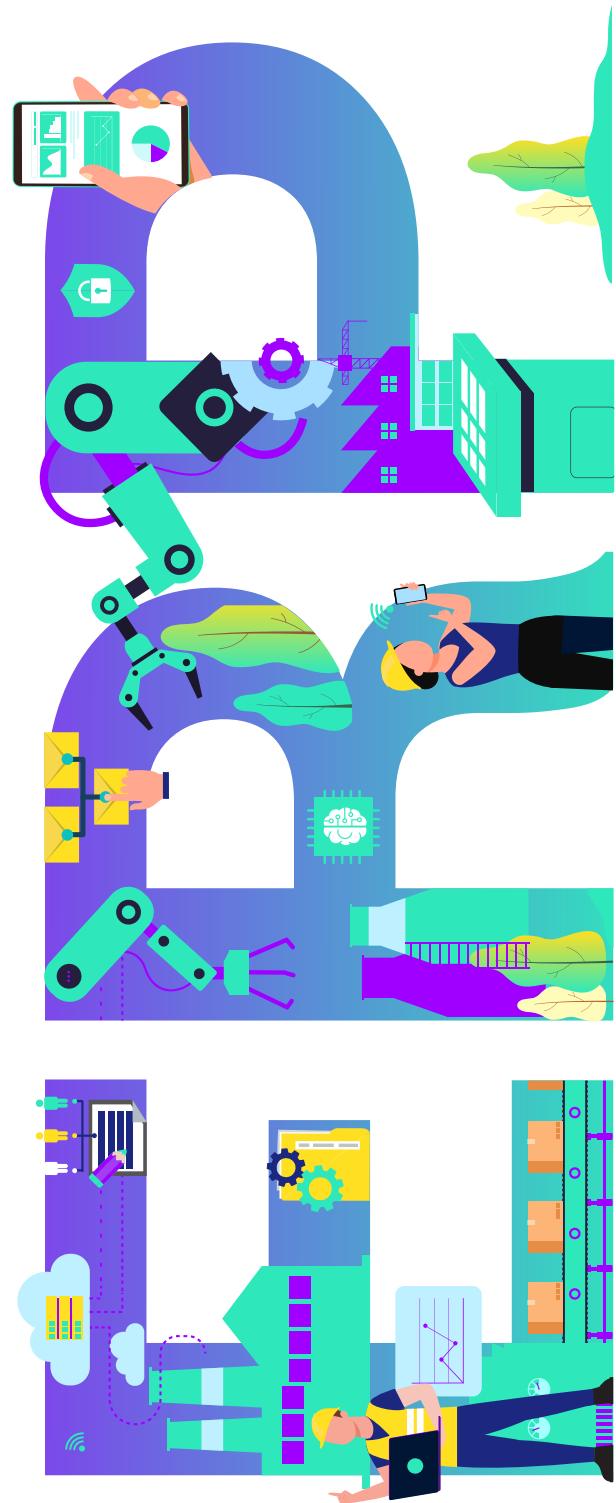

05

Our Products

AKIJ iBOS doesn't think of anything but bringing the top-notch solutions for the customer's business which are aimed to bring ultimate ease to the overall operation in every segment of the organization along with making it all super smooth.

iBOS Enterprise

iBOS Enterprise (ERP) is a standardized, simplified, and integrated business processes including finance, human resources, procurement, distribution, and other operations. To make a firm's work flow efficient and powerfully managed, Enterprise Resource Planning software skillfully integrates all facets of an enterprise into one comprehensive information system that can be accessed by individuals across the entire organization easily.

It increases efficiency and productivity by helping users navigate complex processes, preventing data re-entry, and improving functions such as production, order completion and delivery. Along with reduced repetitive process and training costs, iBOS ERP can make life simple by reducing time and effort required to carry out their daily activities.

Technologies We Work With

To deliver our clients with the finest tech solutions, we think of nothing but the latest and best technologies including ASP.NET, Odoo, Django, React, WordPress, Laravel, JavaScript, Figma, Marvel and the list can keep going.
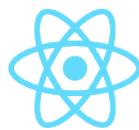

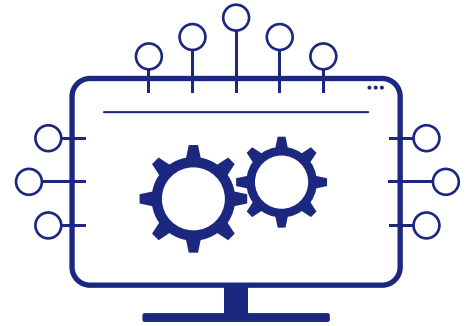

Our Story

AKIJ iBOS Limited was established in February 2020 and has been growing rapidly since then. The company started with a handful of talented developers, designers, and marketers working together on the first AKIJ iBOS product - an ERP solution for big enterprises which eventually evolved for small and mid-sized organizations as well. With clients from various industries across Bangladesh, it was clear we were onto something big.

In 2021, iBOS expanded its team by hiring more talented software engineers to work on new innovative solutions such as iBOS ERP, PeopleDesk, Managerium, iBOS RTM, iBOS SME, and Prime VAT.

Our clientele list has branched out exponentially with clients from all over the world including the US, UK, Canada, etc.

The growth rate of AKIJ iBOS has turned it into one of the fastest-growing software companies in Bangladesh. Now it has turned into a company that specializes in providing solutions for every business need ranging from SME to Large Enterprises.

Our Clients

Our software solutions are currently serving **250+** customers all over the

With our years of experience, we've been serving some of the best organizations in the country including -

SK. JASHIM UDDIN

Owner, Akij Resource

Sk. Jashim Uddin has been a tech enthusiast from all the way back to his childhood. On his sole will, he studied engineering against all the odds and gathered relevant knowledge throughout his education.

Upon arriving at Akij, he envisioned utilizing IT as a business enabler and after 10 years of striving to establish automation in Akij. He then dreamt of a landmark IT entity in the Software Industry of Bangladesh. That was the moment of the inception of AKIJ iBOS.

AKIJ iBOS has already hit the ceiling of excellence in building the finest software as a wing of AKIJ Resource. But like a true industrialist, he wanted to make simpler business process available for all the sectors within the border and beyond it so that they can share the test of progress like AKIJ does.

AKIJ RESOURCE

JAYED BIN RASHID

Chief Executive Officer, AKIJ iBOS

One thing that always intrigued Jayed Bin Rashid was data and the functions involved with it. His career began as an MIS executive at BRAC after his post-graduation in MIS. After that, when he joined Akij, his newfound fascination was various process automation. At one point, he realized that he could do more with the skills he gained by then.

The fact that Bangladesh had almost no configurable ERP was another motivating drive for him. All of the factors combined, he and Mr. Jashim Uddin launched AKIJ iBOS to create a revolution in the IT industry of Bangladesh.

His team refers to him as someone direct, capable, and with great courage to make things happen with professionalism, innovation, customer-centrism, and accountability highly as these are the core attributes that define AKIJ iBOS values and his success.
